***“Study Tour Report”***

**Date: 22/02/2024**

**Report**

**Activity: - “Study Tour: Konkani Darshan”.**

**Objectives for Conducting the Activity :-**

1. To understand geographical features of Konkani , cultural and social life.
2. To study the geographical importance of visited places.
3. To provide firsthand experience to students geographically diverse locations.
4. To study action of Sea waves and forming landforms of visited places.
5. To develop observation skill of students for the study of visited places.
6. To create awareness among students about environment and its conservation

**Methodology of Execution:** Department of Geography has organized a study tour to Kokan during 17th to 18th February, 2027. This tour was an attempt to provide students an opportunity to get firsthand experience of geographically diverse locations in Kokan region. Students during their visit understood the difference between geographically diverse regions. They also got an opportunity to understand differences in language, dressing, culture, and surrounding environment. After the study tour report on it prepared with the help of obtained information from visited places by students under the Guidance of Dr. A. S. Khade, Mr. S. A. Maske and Ms

Madavi A. B.. Secondary data also collected from maps and books related to visiting places.

**Description of Activity in Brief:** Department of Geography organized study tour to the Kokan on 17<sup>th</sup> & 18<sup>th</sup> February 2024. Geographical Tours provided to students an opportunity to collaborate with teachers, and integrate new perspectives with informal environments to enhance learning initiatives. There are 13 Students and 01 teachers were participated in this tour. Teachers given basic geographical information to students at the time of respective visited places in Kokan.

**Outcomes of the Activity**

1. Students understood the difference from geographical point of view.
2. Students acquired firsthand knowledge about geographical differences of visited places.
3. They also understood the differences in language, dressing, culture and environment.
4. Students visited seashores and understood the process of formation of sea waves and various landforms.
5. An awareness about environment sustainability was generated among the students.
