Awareness Program on Waste Management 2025- 2026

A street play (Pathnatya) was successfully organized by the department of physics during the NSS camp to create awareness about the importance of waste management. The rally was conducted on **03/1/2026** at dudhondi village students of the physics department participated enthusiastically in the pathnatya and conveyed a strong message of social awareness. Waste management is a major environmental concern today. Improper disposal of waste leads to pollution, health hazards, and environmental degradation. To create awareness among the public, so our students organized an awareness program on waste management through a street play.

The play highlighted the importance of maintaining clean surroundings, avoiding littering, and practicing waste segregation and poor hygiene through effective acting and meaningful dialogues. Students effectively conveyed the message through dialogues, slogans, and role play, showing the negative effects of poor sanitation and the benefits of clean habits. The street play received a positive response from the audience and successfully promoted awareness about the waste management. Such activities help in building social responsibility and contribute to a cleaner and healthier India.

The activity was successful in spreading the message of cleanliness and motivating people to actively support the Swachh Bharat Mission. The play showed the harmful effects of plastic waste and the benefits of recycling and composting. Through powerful dialogues and simple messages, students encouraged the audience to keep their surroundings clean and use dustbins responsibly.

Conclusion: -

Awareness regarding waste management is essential for a clean and healthy environment. The students' street play proved to be an impactful method to educate society. Collective efforts from individuals, students, and communities are necessary to achieve a clean and sustainable future.
