2026-27

Department:	Department of Physics	
Title of Program:	Student Seminar	
Day : Monday	Date: 7/09/2026	Time: 11am onwards

Synopsis

The Department of Physics organized a Student Seminar for the B.Sc. III students on 7 September 2026. The main objective of the seminar was to enhance students' subject knowledge, presentation skills, communication skills, confidence, and scientific attitude.

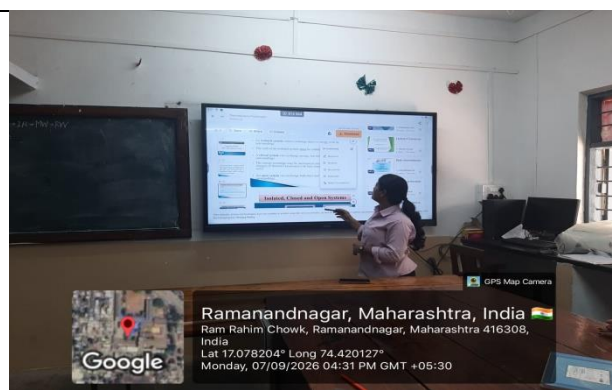

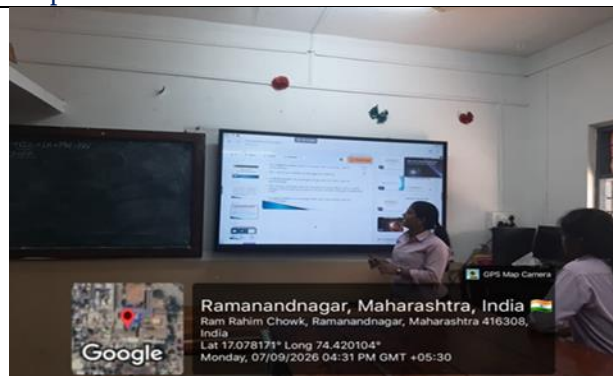

As part of the seminar, students selected and presented various topics related to Physics. The major topics included Thermodynamics, Nanotechnology, and other relevant areas of modern Physics. Students prepared their presentations by referring to textbooks and other academic resources and presented the concepts using PowerPoint presentations, diagrams, illustrations, and suitable examples.

During the seminar, students explained the basic concepts, principles, applications, and significance of their respective topics. The presentations were followed by interactive question-and-answer sessions, which encouraged students to participate actively and express their ideas clearly.

The seminar provided students with an opportunity to develop their critical thinking, communication, presentation, and leadership skills. It also helped them gain a deeper understanding of the selected topics and encouraged independent learning and active participation in academic activities.

Outcome:

The Student Seminar was successfully conducted with active participation from the B.Sc. III students. The activity contributed to the overall academic and personality development of the students and provided them with valuable experience in scientific presentation and effective communication.
